INTEGRATED FOLDING DOOR SYSTEMS

Doors, screen, shade and hardware in one beautifully designed door system

Introducing Integrated Door Systems

Centor's exciting integrated door systems (19 styles) come in outswing folding doors or windows, outswing folding corner unit, outswing double doors, outswing single door, two or three sliding panels configurations, so there's a style for every application.

Each of the Series 200 range features a beautiful screen and shade in a variety of blackout or light-filtering options that completely vanish inside the doorjamb when not needed. With the natural beauty of wood inside and the durability of paintable aluminum outside, the doors are stylish and practical. Or choose from our 400 series, which features an all aluminum system. Plus, we've removed all visual barriers by fully concealing hardware and locks inside the door frame. All that remains are beautiful vistas and doors that move with perfect ease.

Built with the high-quality materials, the Series 200 and 400 Integrated Door systems are designed to be a reliable, high-performing choice that withstands the elements and daily use for years to come. The door systems have achieved an impressive 0.23 Btu/h ft² - °F (1.3 metric) U-factor in recent thermal testing using triple glazed Cardinal 366/180/i89, argon gas, with insulated thermal barrier.

The world's first fully concealed hinge, removes the visual distractions from inside the folding door.

Integrated Sliding Door Systems

Sliding XOX (Series 217 Doors)
Sliding XOX (Series 267 Windows)

The elegant design of the XOX Integrated Sliding Doors or Windows gives you an even greater connection to the world outside. The three-panel configuration features a sliding panel on either side of a frameless fixed panel.

Sliding XO or OX (Series 211 Doors)
Sliding XO or OX (Series 261 Windows)

With a frameless fixed glass panel, the elegant design of the Integrated XO Sliding Doors or Windows gives you an even greater connection to the world outside. A two-panel configuration is available for doors up to 164-3/4" (4186mm)..

Integrated Folding Door Systems

Folding Outswing (Series 205 Doors)
Folding Outswing (Series 255 Windows)

The Integrated Folding Doors or windows come in a wide range of configurations, spanning an opening up to 371-3/8" (9434mm) wide. Clean design with hardware removed from the interior and panel frames equal on all sides give you a gallery-quality frame around your view.

Corner Unit (Series 207 Doors)
Corner Unit (Series 257 Windows)

Blur the lines between inside and out with an Integrated Cornerless Folding Doors or Windows. Designed with the same clean lines as Integrated Folding Doors, you will enjoy even more fresh air and views with each side of the opening capable of spanning up to 189-13/16" (4822mm).

Integrated Single & Double Door Systems

Single, outswing (Series 201 Doors) Single, outswing (Series 251 Windows)

Spanning up to 56-7/8" (1446mm) wide and 113-1/2" (2884mm) tall, the single door or window is perfect for any doorway you prefer.

Double, outswing (Series 203 Doors) Double, outswing (Series 253 Windows)

Available up to 91-7/8" (2334mm) wide and 113-1/2" (2884mm) tall, our Double Integrated Doors or Windows feature a clean look with equal sized panels.

SHADES

Choose from three patterns in light filtering or black out.

Redefining external access on 2 and 4 panel doors

The best just got better! Our doors with 2- or 4-panels in one direction are now available with access from the exterior. This option was not previously possible as traditional handles operate latches located in the edge of the stile and only function on swing panels. However our latest innovation, the Access AutoLatch™, operates latches located in the top and bottom of the panel which function on both swing and folding panels.

On the interior of both 2- and 4- panel configurations, the Access AutoLatch™ lever is concealed within the stile, replacing the traditional handle. On the exterior of a 2-panel folding door, the Access AutoLatch™ is located in the usual position on the 1L or 1R panel.
